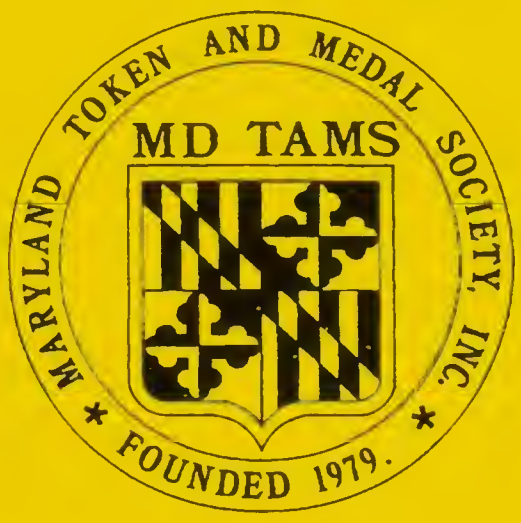
Maryland Amusement Tokens



by

Millard W. Hajek

March, 2003.

INTRODUCTION

The explosion of arcades and family amusement centers that use tokens for their games have prompted the **Maryland Token And Medal Society (MD TAMS)** to compile a catalog of **"Maryland Amusement Tokens."** Even though this cataloging effort is limited to amusement tokens used in the state of Maryland, the author realizes that a catalog for this large token arena can rarely be considered complete. It is just the start of an on-going effort where old issues will be discovered and new specimens issued. It is a start and the search goes on!

The popularity of pizza with youngsters (as well as the older generation) have made this food item a popular bill of fare at arcade snack bars. Many arcades offer birthday party packages that include free tokens along with pizza and drinks as an incentive to frequent their establishments. Arcades have also become business partners with bowling alleys and sports centers which offer baseball batting cages, basketball hoops, virtual golf, etc. to help expand their scope of entertainment.

CATALOG

The tokens are listed by the city, town or community of Maryland in alphabetical order. Each town is assigned a code number from 1 to 1000 that follows the town name. For example **BALTIMORE 60.** Within each town, the tokens are listed alphabetically, not chronologically.

The catalog number consists of three parts; first the town name, second the code number of that town and third the three letter code assigned to that token. For example: The token used by **Joyland** 410 E. Baltimore Street will have a catalog number **BALTIMORE 60 JOY.** It should be noted that the three letter code for the token is not listed alphabetically in this catalog. If **A/S** (Alpert/Smith designation) appears immediately below the three letter code, the code number is the same as the Alpert/Smith catalog listing.

Following is the description of the token as it appears in the catalog.
(OBVERSE:)
(REVERSE:)
(MATERIAL) (SIZE in mm) (SHAPE-other than round) (OTHER CATALOG NOS.)

If the town name is not on the token, the token can be located by using the **CROSS- REFERENCE** which lists all the tokens alphabetically using a key phrase or name on the token.

Many tokens were used in several locations across the United States where businesses established their arcades. Those businesses that established their headquarters in Maryland are listed in this catalog as well as those that have a Maryland town name on them. Those tokens that have headquarters other than Maryland but saw significant use in Maryland are listed under the **MISCELLANEOUS 1000** section of the catalog. For example: **MISCELLANEOUS 1000 DIS** is the catalog number for the **Discovery Zone** tokens that had its headquarters in Sunnyvale, California according to the Alpert/Smith book.

NUMBERING SYSTEM

This catalog was prepared using the Atwood Numbering System which is a simple non-copyright able method which has become the standard method used my may token catalogers. The numbering system follows the assigned numbers, for the most part, used by Stephen P. Alpert and Kenneth E. Smith in their book "video Arcade, Pinball, Slot Machine, and Other Amusement Tokens of North America." Mr. Alpert and Mr. Kirk Smith, son of Kenneth Smith, have graciously granted permission in writing to continue the use and expand their numbering system and to use parts of the Introduction and Text from their book. A very special thanks to messrs. Alpert and Smith for this privilege.

A similar numbering system for the town designation has been used by David E. Schenkman, author of the "Maryland Merchant Tokens" catalog published by MD TAMS. Those amusement tokens that appear in that text include the Schenkman catalog number in their listing here.

As previously explained, each amusement token is assigned a number for the Maryland city, town or community where it was used with the towns listed alphabetically.

ACKNOWLEDGMENTS

A cataloging project of any kind cannot be a solo effort and in particular, in the arena of exonumia. So, I'd like to thank the members of the **Maryland Token and Medal Society** who shared their collections with me and whose expertise and assistance made this catalog possible. In particular I'd like to express my appreciation and thanks to the following individuals for their generous support and who contributed significantly toward this **Maryland Amusement Token** catalog.

Dave Bohaska	Harry Crow	Curt Judge	Bob Schopp
Ed Craig	Robert Johnson	Ed Lanham	Wally Stone

NOTE: Arbutus Firemen's Bingo tokens are listed in ATCA Alpert/Smith book as Maryland Unidentified 992 (Page 93). However, the descriptions are quite vague and, therefore, the existence of the tokens cannot be verified by the cataloger. Consequently, the Alpert/Smith listing of numbers ARE through ARJ are not used here as Alpert/ Smith designations and are used on for other tokens that are known to exist.
